Hi Edna, fantastic and thank you so much for willing to collaborate with us and checking on permits. I've copied the other collaborators on this email so we can talk thru logistics. As of right now, Kevin Cummings and I are planning the field survey portion of the project, Ken Inoue is coordinating the genetics and Susan Oetker is helping with both and is the policy/SSA expert. I've attached a copy of our proposal, let us know what you think. Susan, Kevin and Ken, please feel free to chime in.

Best,
Charles

Dear Charles,
Thank you for inviting me to join your research project. It will be a great opportunity to see how are our mussel populations doing.
Let me ask (to our expert on those issues) about the permit information. Previous experience had showed us that it is more easy for you to get permission through our "Secretaria de Relaciones Exteriores".

I will get back to you with the information.
Best regards,

Edna Naranjo
